

Daler Samadov

JUNIOR GO BACKEND DEVELOPER

Dushanbe, Tajikistan | d04392633@gmail.com |

PROFESSIONAL SUMMARY

Self-taught software developer specializing in **backend development with Go (Golang)**. Passionate about building scalable APIs, designing robust database architectures, and mastering modern backend technologies. Experienced in developing RESTful services, integrating relational databases, and applying software engineering best practices. Demonstrated leadership through technology education volunteer work and consistently seeks opportunities to deepen backend system design expertise. Strong problem-solving mindset with a commitment to continuous learning and professional growth.

TECHNICAL SKILLS

Languages:	Go (Golang) — Primary JavaScript C SQL
Backend:	REST API Development Echo Framework HTTP/HTTPS JSON Processing CRUD Operations Client-Server Architecture Backend Fundamentals
Databases:	PostgreSQL SQLite SQL Query Design & Optimization
DevOps & Tools:	Git Docker Linux Command Line VS Code PyCharm
Frontend:	HTML5 CSS3 JavaScript React (Basic)

PROJECTS

REST API Development with Go

- Designed and built backend services using **Go** and the **Echo Framework**, implementing clean RESTful API endpoints.
- Developed full **CRUD** functionality with structured JSON request/response handling and input validation.
- Integrated **PostgreSQL** databases with optimized SQL queries and proper connection management.
- Applied backend best practices including modular architecture, error handling, and API design standards.

Database-Driven Applications

- Designed and managed relational databases using **PostgreSQL** and **SQLite** with normalized schemas.
- Built applications with persistent data layers, complex SQL queries, and efficient data management workflows.

Cryptocurrency Web Platform

- Developed a responsive cryptocurrency-focused web application with dynamic frontend functionality.
- Created interactive user interfaces using **HTML5**, **CSS3**, and **JavaScript** with mobile-first design principles.

VOLUNTEER EXPERIENCE

TechnoHub Volunteer

Educational Technology Programs & Camps

- Assisted instructors during programming and technology workshops, supporting hands-on learning for children and teenagers.
- Mentored younger students through practical technical tasks, breaking down complex programming concepts into understandable steps.
- Contributed to organizing educational technology camps and events, fostering an engaging and inclusive learning environment.
- Developed strong leadership, communication, and public speaking skills while guiding diverse groups of learners.

EDUCATION & CERTIFICATIONS

Qwasar Silicon Valley

Advanced Software Engineering Program

- C Programming Level 1 & Level 2** — Mastered algorithms, data structures, memory management, and Linux fundamentals.
- Fullstack Foundations** — Gained comprehensive software engineering fundamentals and fullstack development principles.
- Core competencies: Algorithms, Data Structures, Software Engineering, Linux, Memory Management, Problem Solving.

CURRENT LEARNING FOCUS

Advanced Go Development | PostgreSQL Optimization | Docker Containerization | Backend System Design | Authentication & Authorization (JWT, OAuth) | Scalable Backend Architecture | Microservices Fundamentals
